9 March 2025
Client Meet: Team AlethioSphere

1. Saketh: Figma Design Implementation Reviewed
2. Romil: Video Avatar implementation discussed, has design for avatar ready, has text to speech modules
3. Raghav: using deepseek api rn, has speech to text modules ready
4. Interact with Psychiatrist/ Mental Health Councellor to compare different text generation models: DeepSeek, Gemini, OpenAI, Claude, etc. What are ten questions we can ask for testing it? Review the response and grade them. (We will eventually need human annotations, which will also be taken from free users)
5. Would we be able to locally run the models?
6. Record latencies, it is not that high rn
7. Manasi: Totally anonymised for free users, totally encrypted for paid users. Try to Azure
8. PII Filters for anonymous users: Try to use node.js libraries to reduce llm dependencies
9. Saketh: Try to make as many screens as possible
